

# 2023-2024 MIBAC Collaborative Quality Improvement Physician Organization Participation Agreement

Name of Physician Organization:

Our leadership team has reviewed the following agreements:

- 2023-2024 Expectations for Quality Improvement Participation
- 2023-2024 QI Participation Requirements and Responsibilities Requirements by Role document

Our physician organization has met the following participation requirements:

- Our physician organization has selected practitioners within the Expectations for Quality Improvement Participation specifications
- Our physician organization has selected an administrative lead for Quality Improvement activities of MIBAC

Please list the name and email address of the PO administrative lead:

- Our physician organization has selected a steering committee delegate (if PO has Chiropractors, please name both your PCP and Chiropractor delegate)

Please list the delegate's name, credentials, and email address:

- Our PO leadership has identified an administrative contact (may be the participating clinician or other site staff) at each practice for internal use at the PO level
- PO leadership understands that it is our responsibility to provide functional, unique email addresses for each participating clinician, and that these emails must be monitored for communications from the CC. Additionally, we will provide updated information to the CC within 5 business days if made aware by the participating clinician or the CC that changes have occurred or emails are being returned as undeliverable to the provided email address
- We have an active Quality Improvement (QI) Committee or other similar structure in place to plan, implement, and oversee consortium-wide QI initiatives that arise from MIBAC meetings

1. Prior to the roll-out of Quality Improvement activities, you are required to review the appropriated responsibilities with those selected for the designated roles within the MIBAC

2023-2024 QI Participation Requirements and Responsibilities document, and to fully review and comprehend the 2023-2025 Expectations and to provide all participating individuals the contact information for the MIBAC coordinating center and our PatientIQ program lead.

2. Prior to your PO being accepted into the MIBAC Collaborative Quality Improvement activities and going live, the Site Administrative Leads, Steering Committee Delegate, and Participating Practitioners will attest in writing that all necessary clinic and provider record access is indeed available to the MIBAC Data Auditor.
3. By July 15, 2022, the PO Administrative Lead will submit the agreements between the PO and the participating practitioners to the Coordinating Center.
4. This agreement may be terminated on 2/28/2023, 5/31/2023, 8/31/2023, or 11/30/2023 with 45-day written notice in advance of these dates. Please note that this may result in repayment to BCBSM of incentives paid up-front. A new agreement will be signed annually if the participating PO selects renewal.
5. There is no fee for participation. The PatientIQ subscription is funded through the MIBAC grant.
6. Please refer to the BCBSM PGIP site for specific information on applicable incentives.
7. The data vendor for this program is PatientIQ, and a Data Use Agreement exists already with Henry Ford Health, therefore no additional Data Use Agreement is needed at this time.

I have read and understand the terms stated above.
